Comments (use back if needed):

There are about 3 billion people in this
world. Many of these people can't afford
or don't have energy. Coal is a reliable,
affordable, and abundant ~~see~~ source of energy.
As far as climate change, it has always
been happening, with or without people on
this earth. Coal can help those people
who live without energy. Think of how many
people rely on coal. For energy and for
jobs. The last thing the BLM should do is
make it harder to mine that coal.
